

General Information

The Sterling 360 is manufactured by Mitsubishi Fuso Truck and Bus Corporation. The introduction of this vehicle is ongoing. It began in mid-February 2006. Service literature, specifically the *Sterling 360 Workshop Manual*, has been adapted from existing Mitsubishi Fuso service literature, including the service group structure. However, Service Bulletins will be issued using the normal Sterling service group structure (American Trucking Association service groups). To avoid confusion, see **Table 1** for a cross reference. Also, all Sterling service bulletins that apply to the 360 will list the workshop manual service group in the title of the bulletin (**Example:** a Group 83 service bulletin might be entitled Heater Core Replacement–Group 55).

Sterling 360 Service Groups		Normal Sterling Service Groups	
Number	Name	Number	Name
00	General	00	General Information
01	Maintenance Schedule	01	Engine
11	Engine	09	Air Intake
